

Narasingam M

Senior SDET | Java, Selenium & API Automation

Chennai (Open to Relocation) | +91 8870460522 | narasingam.m96@gmail.com | [linkedin.com/in/narasingamm](https://www.linkedin.com/in/narasingamm)

SUMMARY

Results-driven Senior SDET with 6+ years in **Test Automation, API Testing, and Regression Testing** across **Fintech, SaaS, and Enterprise domains**. Skilled in **Java, Selenium WebDriver, TestNG, POM, Data-Driven/Hybrid Frameworks**, with API validation using **RestAssured, CI/CD, Jenkins, GitHub, MySQL, and Microservices Testing** in **Agile/Scrum** environments. Upskilling in **Playwright and TypeScript**.

SKILLS

- | | |
|---------------------------|-----------------------|
| • Selenium WebDriver | • TypeScript |
| • Java | • Jenkins |
| • TestNG | • Git, GitHub Actions |
| • REST Assured | • Maven |
| • Postman | • MySQL |
| • Page Object Model (POM) | • CI/CD |
| • Playwright | • Agile/Scrum |

EXPERIENCE

Senior Software Engineer - SDET

Accionlabs (Client:Freshworks), Bangalore, Karnataka, India

July 2025 - July 2026

- Directed regression execution and root-cause triage across 36K+ automated tests spanning 130+ CI/CD pipelines, sustaining release stability for a Freshservice-scale production environment.
- Engineered and maintained UI automation suites using Selenium WebDriver, Java, and TestNG within a Page Object Model architecture, covering critical user workflows across the platform.
- Automated end-to-end API test coverage using Rest Assured and Postman, validating request/response contracts, authentication flows, and data integrity across microservices prior to release.
- Independently owned 10 end-to-end regression pipelines across Pre-Prod and Regression environments, driving proactive fixes to reduce pipeline failures.
- Pioneered AI-assisted automation workflows using Cursor AI for script generation and flaky-test debugging, accelerating development and reducing maintenance overhead.
- Built an RCA Analyzer pipeline comparing benchmark vs. squad execution results, accelerating failure-triage time and improving root-cause accuracy.

QA Automation Engineer

Karbon Business, Bangalore, Karnataka, India

Jun 2024 - July 2025

- Architected a POM-based Selenium/Java/TestNG framework to automate critical Karbon FX UI workflows, significantly reducing manual testing effort.
- Developed 300+ Rest Assured API automation test scenarios covering forex transaction APIs and authentication flows, improving API validation accuracy and eliminating recurring backend defects.
- Led end-to-end test strategy for the Karbon FX Forex platform, including functional, regression, integration, cross-browser, and UAT testing, across 10+ major production releases.
- Partnered with Business Analysts to translate software requirements into comprehensive test plans, expanding test coverage and proactively identifying edge-case defects pre-release.

- Conducted cross-browser and responsive testing across Chrome, Firefox, Safari, and Edge using Selenium Grid, reducing browser-specific production defects.

Career Break | Personal

Chennai, Tamilnadu, India

September 2022 - June 2024

- Took a planned personal career break while staying current with QA industry trends, tools, and best practices, preparing for a successful return to the workforce.

Member Technical Staff-QA

Zoho Corporation, Chennai, Tamilnadu, India

July 2018 - September 2022

- Architected and maintained a Selenium WebDriver + Java automation framework with TestNG and POM for Zoho Recruit and Zoho Workerly, authoring 1,200+ automation scripts and reducing manual testing and regression execution effort.
- Implemented REST API automation using Postman to validate 150+ API endpoints for Zoho Recruit's recruitment workflow engine, improving validation accuracy and reducing backend defect escape rate.
- Designed comprehensive functional, regression, integration, and smoke test scenarios for SaaS recruitment and workforce management modules, expanding coverage and enabling same-day regression sign-off for sprint releases.
- Optimized test execution using efficient XPath/CSS locator strategies, WebDriver wait handling, and parallel execution configuration, while establishing Extent Reports and Log4j-based reporting for data-driven release decisions.
- Logged, triaged, and resolved critical P1/P2 defects in JIRA, partnering with Product Owners and developers to reduce production bug escape rate and ensure sprint traceability.
- Mentored 2 junior QA engineers in Selenium automation fundamentals, TestNG framework design, and API testing best practices, strengthening team automation capability.

Zoho Trainee

Zoho Corporation, Chennai, Tamilnadu, India

July 2016 - June 2018

- Selected via competitive campus recruitment for Zoho University — a program admitting top 1% of applicants — and completed intensive training in Core Java, DBMS, Data Structures, and Web Technologies.
- Specialized in Manual and Automation Testing for Zoho Recruit product; promoted to full-time Member Technical Staff-QA based on outstanding performance evaluations.

EDUCATION

VSVN Polytechnic College

Diploma in Mechanical Engineering

Virudhunagar, Tamilnadu, India

June 2013 - April 2016
